

# Mi Commuter Helmet User Manual

Read this manual carefully before use, and retain it for future reference.

## 1. Product Overview

## 2. Size Selection & Measurement

### Helmet Measurement Method

Because the helmets are different in size, you need to choose the size that suits you. After measuring your head circumference, you can select the right helmet size according to the circumference. If the helmet is too loose or too tight, you can adjust it by turning the adjustment wheel until it is comfortable to wear, or try a different size helmet.

	Size	Head Circumference	Head Width
Helmet	S	52 - 55 cm	≤16.5 cm
	M	55 - 58 cm	≤17.4 cm

The head circumference needs to be measured twice to get the maximum value. The first measure, by using a soft measuring tape, is around the hairline to the point that 2 cm (about 0.8 in) below the occipital bone. The second measure is around the brow bone to the occipital bone.

Note: Due to different head shapes, the helmet may not match your head completely. If you feel uncomfortable while wearing it, please select a different size.

### 3. Wearing Method

---

a. When wearing the helmet, the front of the helmet should be level with the back, parallel to the ground. It cannot provide enough protection if you wear the helmet in the wrong way.

## 5. Precautions

---

1. Please select a helmet suitable for your size according to the helmet size comparison table.
